### RLM WELCOMES

We're pleased to welcome three new business partners to our growing list of fashion leaders who count on RLM Apparel Software.

**Modern Vintage** is a lifestyle brand and fashion footwear collection for men and women inspired by contemporary art, music and film.

**Simon Miller USA** has evolved from a niche denim brand to a fully realized collection, offering high-end knitwear, shirts and more.

**Thom Browne** is an American fashion designer with global brand recognition. Thom Browne began his career designing men's bespoke clothing and expanded his line into a full ready-to-wear collection for men and women.

## Latest *FashionManager* Enhancements Streamline Critical Business Processes

**RLM Apparel Software** is pleased to announce another in an ongoing series of system-wide enhancements to its industry-leading *FashionManager*<sup>™</sup> enterprise solution.

The latest set of developments are focused on helping clients more effectively manage and streamline front-end and preproduction business processes. These expanded activity notifications, time-saving productivity tools, and reporting capabilities empower teams with greater control and visibility throughout the materials management, product development, and sampling process.

The latest round of system improvements include:

- Email Notification of Changes to Bill of Materials (BOM)
- Email Notification of Final BOM Approval
- BOM Detail Report by Sales/Production Plan by Color/Size
- Email Notifications of Changes to Cost Sheet
- Print Cost Sheet with Material Master and BOM Details
- Expanded Raw Material Management Capabilities
- Iterative Lab Dip and Material Testing/Approval Tools
- Option for Multiple Utilization Codes on Raw Material Master
- Comprehensive Intercompany Style Master Sync Capabilities

*FashionManager* clients are encouraged to contact their RLM Customer Service Representative with any questions regarding the new release and features.
