

Financial Report Designer

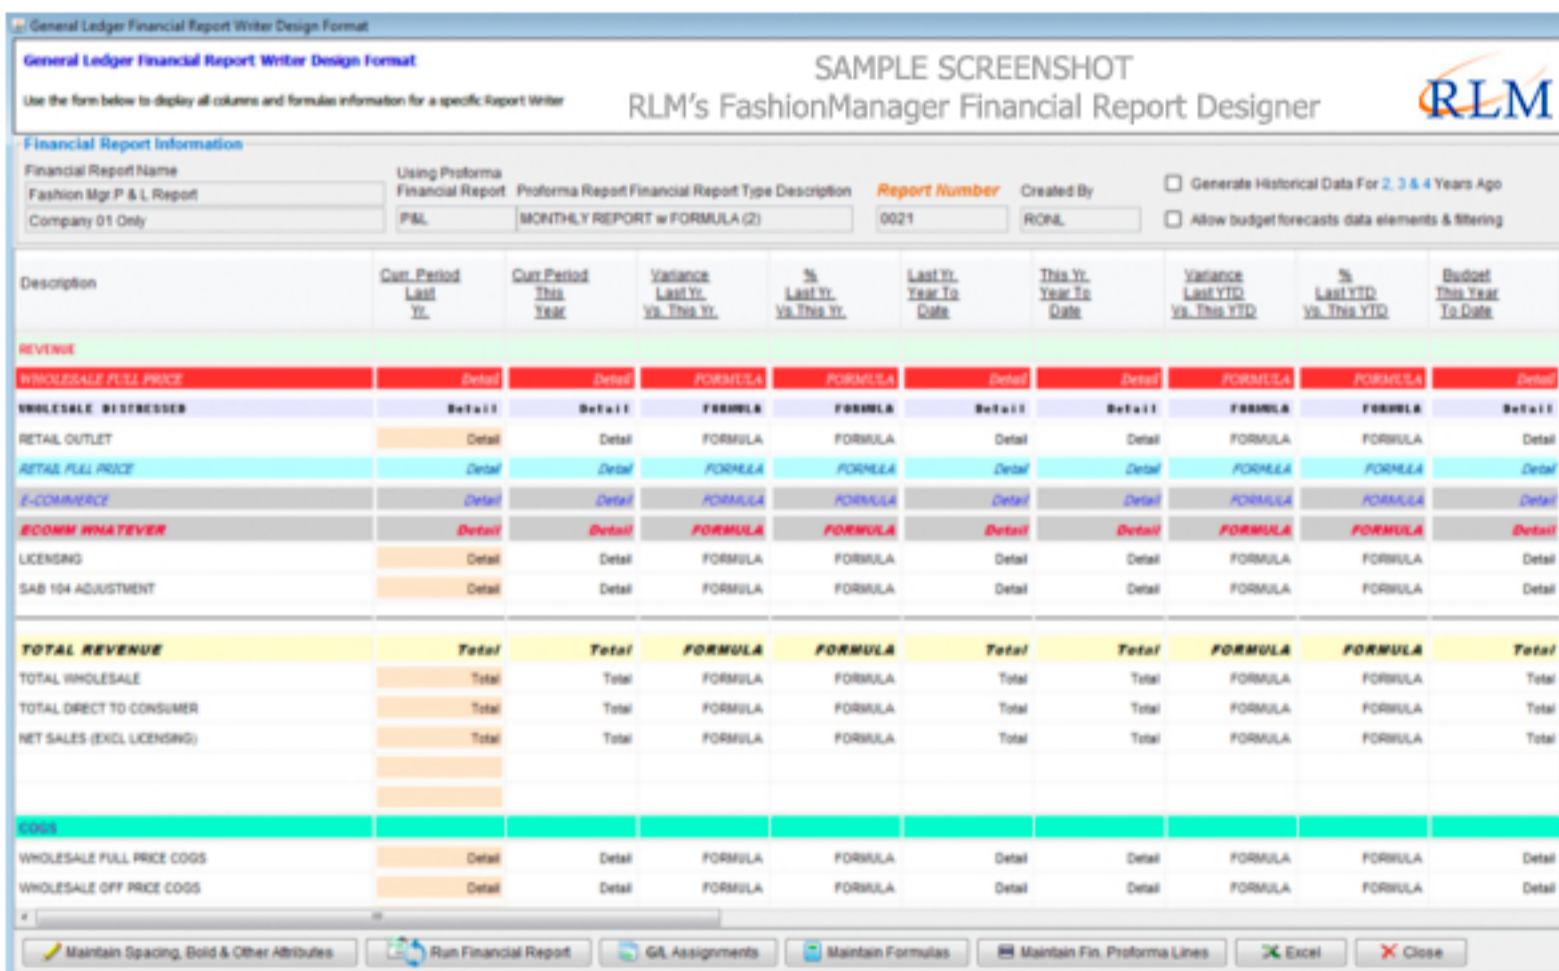

RLM Releases an All-New Financial Statement Report Designer in our FashionManager Solution

RLM *FashionManager* clients can now use the Financial Statement Report Designer to build Balance Sheets, Profit and Loss Statements, Cash Flow Projects (based on budgeting and forecasts), comparative and a host of other financial reports to fit their individual needs.

Examples of the simple to use and time-saving capabilities of the report designer include:

- Compare month-to-date versus budget
- Build in depreciation calculations
- Copy calculations from one location to another
- Add colors (over 100 available) to specific rows/ranges
- Change fonts (50 available) on specific rows/ranges

FashionManager clients are encouraged to [contact](#) their RLM Customer Service Representative with any questions regarding the new reporting tool.

Client Feedback

From Cyrille Baudet, COO, John Varvatos Enterprises

"The new RLM reporting tools is a fantastic addition to the ERP.

It combines the accuracy that is necessary for producing statutory financial statement, and the flexibility that is sought after when designing financial management reporting.

The powerful filters help produce rapidly department and store reporting and dashboard. The complex formula and calculation available, and the various formatting options are the key to produce and distribute detailed reporting without using any spreadsheets.

This is game changing for our team, and we will deliver faster relevant information to a larger number of stakeholders."

RLM thanks the talented team at John Varvatos for collaborating with us in the development of the Financial Report Designer tool.
